k. *Description of proceeding*: The Commission has initiated a proceeding to determine if reserved authority under article 15 of the project license should be used to require expanded operation of a fishway. The proceeding is in response to concerns raised by the U.S. Fish and Wildlife Service (FWS) regarding the impacts of project-induced turbine mortality on downstream migrating adult blueback herring. The FWS believes that the fishway should be operated from June through August, during the adult blueback herring out migration period. The fishway is currently operated from August through September for protection of downstream migrating juvenile blueback herring.

On June 14, 1996, the Commission issued a Draft Environmental Assessment (DEA) analyzing the environmental impacts of operating the existing fishway for downstream migrating adult blueback herring. Copies of the DEA can be obtained by contacting the Commission's Public Reference Room at (202) 208–1371.
